

VOL. LVII—NO. 51

\$2.00 Per Year, \$2.50 In U.S.A., 5c Per Copy

The I.O.D.E. Medal, presented to some high school pupils each year was won this year by Mary Jain, it was announced by P. V. Smith, the principal, this week. Colin Dymond was named winner of the Grimsby Lions Club Medal.

In making the announcement, the following were named:

Ham Farrell, William Fisher, Charles Hill, Havelock Jewson, Wilson Le Drew, Donald Merritt (Hist.); John Schott (Hist.); Ronald Vickers, Douglas Walters, Earl Smith (recommended).

Grade V. & 6.

In making this announcement, P. V. Smith high school principal, also announced several other awards and the promotions which have been granted to the high school students. Other awards presented were as follows: The Strathcona Medal, Andrew Fulton; Oratory Awards; Junior, Louise Knight, Nigel Bant; senior: Leslie Pope, Donald Watt; Grimsby Merchants' Shield, art, Joan Greig; commercial, Katie Pyndyk; history, Donald Watt, Latyn, Penelope Smith; Mathematics, Charles Ramsey; Oratory, Donald Watt; general proficiency, Edward Marfel.

Grade X to Grade XI
Honours — Nigel Bant, June Ward, Barbara Boehm, Doris Bromley, Graham Brownlee, Joan Eaton, Alison Jeffries, Douglas McAlonan, Eileen McPherson, Ian Marr, Dorothy Metcalfe, Arlene Musselman.

Pass Standing — Esther Bain (Hist.); Albert Blanchard (Fr.); Beverly Burgess, Edwin Jones (Hist., Fr.); Betty Kunkle, Jean Le Drew, Harry Levine (Fr.); Allan McKenzie, Evelyn Mackie (Hist.); Alexander Marr, Donald Merritt, Bruce Shafer, Marigold Duck (Aegrotat).

Grade XI to Grade XII

Grade XI to Grade XII
Honours—Merl Betzner, Patricia Clattenburg, Alice Noale, Suzanne Pasche, Mary Tenny.
Pass Standing—Lawrence Burgess, Andrew Fulton, Walter Haltschlag, Charles Johnson, Ruth L...

Special Proficiency Awards went to the following: Grade DKA, Louise Knight; Grade DKB, Ross Brubaker; Grade X, Allison Jeffries; Grade XI, Mori Betzner; Grade XII, Newell Smith. Then, Charles Johnson, Ruth Lindemann, Margaret McVicar, Donald Pettit (Alg. Fr); Willis Pettit, Leslie Pope, Ian Stevenson, Robert Thompson (Hist. Alg.); Kathleen Yeager, Bingham Harris (Astron.).

<p>Grade IXA to Grade X Honours — Elizabeth Hand, Louise Knight, Madeline Fogacher, Lois Rahn.</p>	<p>Grade XII to Grade XIII Honours — Edward Brubaker, Eleanor Dymond, Constance DeLa- plante, Paul Morgan, Betty Shivas</p>
---	--

<p>Pass Standing — Elizabeth Davies, Anne Earle Lily Earle, Nancy Gordon, Joan Gray, Thelma Hawes, Joan Heywood (Hist.); Marie Le Page, Yvonne Ockenden, Bernice Robertson (Hist.); Gertrude Webb.</p>	<p>Pass Standing — Douglas Dick (Geom.); William Fellows, Lillian Griffith, (Lat.); Lelaina Jones, Shirley Mason, Peter Morgan, (Lat.).</p>
---	---

Grade IXB to Grade X
Momours—Ross Erubaker, Phil-
 lip Moberley.
Pass Standing —Douglas Bed-
 ford, Charles Bierd, Douglas Cole,
 David Dick (Math. Fr.); Howard
 Duffield, Kenneth Fairbanks, Wil-

Partial Promotion—Glenna Far-
 rell, Betty Fisher, Dorothy Gled-
 hill, Virginia Hewson, Edward
 Konkke, Louise Larsen, Helen
 Seasmell.

Subjects which appear in brackets must be re-written.

Mrs. Clay Merrill, wife of the United States Counsel in Hamilton, will officially open the fifth annual Grimsby Lions Club Charity Carnival next Thursday evening.

The Carnival, being held this year on the municipal grounds adjacent to the Grimsby Town Hall, will have many new features. A ferris wheel and merry-go-round will be operated, while Garden Brothers corps of entertainers will be on hand for two shows each night. In addition to this there will be clowns to keep things interested.

The usual run of booms and refreshment stands will again be in operation, while a grand assortment of prizes are to be drawn for both Thursday and Friday nights. The prizes this year are, in the opinion of officials of the club, in keeping with the times. The first prize calls for the winner receiv-

sie Small, Dorothy Vickers.

DURING Army Week, June 29th to July 5th, the attention of the public will be focused on the men in battle dress. And it might be well at this time for every civilian to ask him or herself several questions concerning our soldiers. Have we not tended to forget them for the color and glamour of the Air Force and Navy? Have we not neglected to make a fuss over them because they have not as yet participated in a major campaign? The answer to these questions can be yes with but a few exceptions.

Actually this neglect of our Army has not been intentional, but rather the result of circumstances. It does not show any lack of respect for our soldiers, but merely a lack of thoughtfulness. Then let us consider the sacrifices made by our men when they join the Army, and the role they will play in the coming victory. It should enable us to give them more of the credit, respect and honor which is their due.

A man makes a sacrifice the very day he steps into an Army uniform, and from that day on, he continues to make them. His liberty is restricted. He takes orders all day, and has to carry them out with thoroughness and efficiency. The twenty-four hours of the day are planned for him, and he must not vary his activities during them.

Even when he is on pass, he is still on parade before the eyes of the public. By his conduct, he and his comrades will be judged so that he must be continually careful not to bring ridicule or disrespect to the uniform he wears. His Army life is a complete change from that has to adjust himself accordingly.

If he is called upon to make the final sacrifice—and many of our men will be before victory is won—will he go to his death with the knowledge that he is honoured, respected, and that his name will be a monument before which Canada will pay tribute to his heroism? It would indeed be a bitter death if this knowledge

would indeed be a bitter death, if this knowledge was lacking in our young men in uniform. So during Army Week, it is the duty of every civilian to show appreciation of our fighting men. They must not feel they are the "forgotten men" of the war. Their task will be to consolidate our victory on the continent of Europe. It is our duty to show them our admiration and respect for the victory they will bring us.

For this reason, we of the Independent staff take this opportunity of greeting our friends in battledress. We have enjoyed receiving your letters, and we hope that you will continue to write whenever you get an opportunity. We sometimes are not able to answer them all, but you may be assured that they are appreciated, and we hope that the receipt of this paper will in its way be our way of thanking you for them, and for your efforts on behalf of the country and the democratic cause. Good Luck to you all!

— By FRANK FAIRBORN, Jr. —

UNDER The Spreading Chestnut Tree, The Village Smithy Stands; The Smith A Mighty Man Was He, With Large and Greasy Hands.

There has never been a dearth of Chestnut Trees in Canada, but a recent years there has certainly been a scarcity of Smithys. At one time blacksmithing and horseshoeing was a real art. Is the war with its ever increasing restrictions of private automobile travel and truck transportation going to bring the Smithy back to his own? In the large and small cities the milk and beef companies and the large departmental stores and wholesale houses are rapidly going back to the horse for delivery purposes. Will the change in methods go far enough to bring back the old time blacksmith shop?

School Cadet Corp returned home last Sunday after a week spent at the Cadet Military Camp, Bolton. The Camp is being held on the grounds of the Neighbourhood Workers' Association Camp, and according to Principal P. V. Smith, who had charge of the cadets, it was ideally suited for the purpose. Equipment such as the Brest, Tommy, and Maser guns, and revolvers, as well as bombs, trench mortars and anti-tank guns. The use of gas in attack and the laying of a smoke screen were interesting demonstrations. The boys also had tear gas sprayed on them, and anti-gas equipment and its use were studied. A convoy of mechan-

The week which the Grimsby Cadets spent at the camp was the first of a series of four weekly camps being held there for the cadets of Ontario's secondary schools. The cadets travelled to Toronto by train, where they boarded a special train for Bolton. The distance between the station and the camp was marched by the "trainees" — some eight hundred and fifty of them.

The camp is organized under the command of Colonel Henderson of Hamilton and Captain Charles E. Read, chief cadet officer for M.D. 2, with headquarters at Toronto.

The camp itself was formed into a battalion of five companies of four platoons each, while a band of between forty and fifty pieces provided military music. Military discipline was observed in every respect, and a full program of training, consisting of lectures and practical demonstrations, was provided for each day. Special entertainment, including motion pictures, was provided in the evenings, and the swimming tanks at the camp proved popular with the cadets. The food was excellent. On the last day of camp a sport's program was held.

In course instruction were lectures and demonstrations in wood-

The steps at the foot of Nelson

underneath which have been built by the Grimsby L. & S. Club as a convenience for winners, have now been completed, and many local youngsters as well as outsiders, have already used them.

Cecil Bell, who had charge of the project, stated this week that he hoped parents would bear in mind the fact that there is no lifeguard at the steps, but there is generally some old swimmers present to keep an eye open for the very young swimmers.

LIONS CARNIVAL NEXT THURSDAY & FRIDAY

RADIO SPOTLIGHT

DIALING WITH DAVE...

There'll be some change made. There went a popular song of not so long ago. And when Charlie McCarthy's program returns to the airwaves on Sunday, September 6th, it will be quite a different show. Edgar and Charlie and Ray Noble will be there all right, but Abbott and Costello branch out with the Andrews Sisters on a show of their own. Emphasis on the new McCarthy set-up is going to be on the establishment of characters, well-defined, who will have "play" parts in a running story theme. No doubt, though, that any changes will be worth-while improvements that will assure the McCarthy show of top-notch ratings for another year.

While many of the winter favorites have gone by the board for the summer holiday months, others stay with us; and one of these is Jimmie Fidler's Hollywood commentaries. Athletic, dynamic Jimmie Fidler, has led an active and interesting life, since the lure of the show business first caught him some fifteen years ago. Jimmie, for the past few months, has been heard on a network of Canadian stations on Monday night. But his broadcast of the 29th was the last on that night, and you'll hear him this Sunday at 9.30 p.m., and at that spot throughout the summer.

The story of Carry Murdoch, "Soldier's Wife" is the story of many women in Canadian homes today; women whose men have joined the colors—women who are faced with a new, different, and often difficult world. Carry's story is told daily on the CBC network at 11.30 a.m., under the banner of the War Time Prices and Trade Board. Thus the program has double significance. With rationing by coupons now in effect, the daily messages from the Board, directed to the Canadian housewife, will help many women over the hurdles of a new war-time measure. You'll like the story too—it is told Monday through Friday.

Glen Miller met Eddie Duchin's young son—to find that the youngster owned practically all Glen's recordings—the Miller music was his favorite! The next day, Glen made the youngster a present of a complete selection of his own "Dad's records"—a mighty nice gesture, Mr. Miller! Dennis Day, now on holidays while the Benny show takes its usual summer "time out" period, is doing right well by himself. Has already guested on a number of big weekly shows, and a number of dates pending. Mo'ney Day is very, very proud. Ty Power, Jr. (the movie hero) recently did a "Cavalcade of America" script with William Farnum, grand old man of the theatre—who did many a tour with Ty's famous pal! Al Johnson is making the boys in Alaska merry with his camp! Weeks record hit—"Sleepy Lagoon" recorded by Vaughn Monroe.

Round Pegs Placed In Round Holes Of Canadian Warriors

Science Fits Men To Their Particular Jobs After a Series of Tests—Psychology Plays Its Part In War.

SCIENCE is lending a helping hand to the army in the selection of men as well as in the design of tanks and guns. No longer will a soldier end up in a job he is ill-suited to do. A board of world-famed psychologists are directing the selection of personnel throughout the army by the use of scientific mental tests.

Almost as soon as a soldier signs on for active service this series of tests begins. They are both oral and written. None of the questions embarrass or frighten a man, although he may have had some unpleasant thought about psychologists and their tests.

The tests determine his fundamental capacities, the extent of his education, experience and general tendencies. They are in every way designed to help him find the work to which he is best suited in the Army.

Sometimes after a series of such tests it is decided that a man or officer in the infantry would be better employed in the artillery or tank corps. If such is the case a transfer is arranged.

Both the British and American armies are using the same plans for personnel selection. And due to the efforts of General McNaughton, the Canadian system of selection combines the best features of both with a few new ideas by Canada's own professional men.

Canada

Fair land of peace! Oh, may'st thou ever be
Even as now the land of Liberty!
Treading serenely thy bright upward road,
Honoured of nations, and approved of God!
On thy fair front emblazoned clear and bright—
Freedom, Fraternity, and Equal Right!

—Famella S. Vining—1943

CANADIAN SOLDIER EATS WELL ROUNDED DIET OF TASTY FOOD

Exact Army Standards Call For The Finest of Foods — Special Types of Food Strengthen Soldiers on Special Work — Right to Grouch is Still a Soldier's, But Few "Beefs" Are Heard These Days.

TRADITION says that an army lives on bully beef and hard tack, but Canadian soldiers are training on diets that include proper amount of proteins, minerals, carbohydrates and all the vitamins in a dietitian's alphabet.

The army mess kitchen has been modernized along with every other part of the service, and a glance at a regular army sheet shows that no soldier misses "Maw's apple pie" for long after he has been eating army meals.

Toronto's Royal York Hotel. Here's the menu:

Clear Onion Soup, Swiss Steak, Potatoes boiled in jackets, Buttered Carrots, Bread, Butter, Rice and Raisin Pudding, tea or milk.

When the day's work is completed, there's an evening meal ready that is guaranteed to restore lost energy and pep. It would whet the appetite of even the most fatigued recruit. Here it is straight from another army diet sheet:

Cream of Carrot Soup, Cold

A mobile kitchen, serving meals in a rough and ready way to officers and men of the Canadian Army, is in reality a compact and well equipped headquarters for the dispensing of the right type of foods to our fighting men.

A day chosen at random from the diet sheet shows that a soldier starts off with a whacking big breakfast that includes the following:

Grape fruit Juice, Cracked Wheat, Fresh Milk, Griddle Cakes, Bacon, Corn Syrup, Toast, Butter, Coffee, Cocoa.

After a hard morning's training Johnny Canuck relaxes over a lunch that would be a credit to

Roast Pork, Potato Salad, Plain Muffins, Blanc Mange, Doughnuts, Tea, Iced Cocoa, Fresh Apple.

The army's concern with foods doesn't stop with the planning of balanced diets. Once a diet sheet is made up and signed by the Commanding Officer of a unit, it must not be changed by the cook without the Officer's approval.

At meal times, and Orderly Officer visits the messes and asks the

VISIT TO YOUR DENTIST AT SIX MONTH INTERVALS ARMY RULE

WHEN Private Jones, Smith or Skidzky gets a tooth ache he reports to the dental clinic in the particular camp in which he happens to be taking his training. Trained men are available day and night to take care of his dental requirements in exactly the same way his own dentist would do it.

The size of dental clinics varies from one to five chair clinics. In the case of a large training centre like Camp Borden four clinics staffed by as many as twenty dental officers handle the requirements of the entire camp.

Each clinic is equipped with X-ray apparatus, the finest instruments available and drugs that meet the standards set by the dental profession in Canada.

Working in the laboratories of the clinics are men who have been trained with the co-operation of the University of Toronto Dental College in making dentures, doing gold and other metal work and all types of repairs and adjustments.

During his first day in the army the recruit pays a visit to a dental clinic. The condition of his mouth is charted in duplicate by the dental officer and his trained assistant. One copy of this chart goes to Ottawa where it is kept on file with the recruits papers to assure

that he will get adequate dental treatment when he is discharged. The second copy of the chart the recruit carries with him wherever he goes.

At his first camp the work needed on his teeth is begun. If he is moved to another camp before it is completed, his chart, which is kept up-to-date, shows the dental officer in the new camp exactly how much has been done and how much more is necessary to put the man's teeth in first class condition.

In some cases a recruit may join the Army with a mouth full of bad teeth that have to be extracted. After the extraction work is completed, a denture is made which would have cost him a stiff price in civilian life.

Every six months or so a soldier parades to a dental clinic to have the condition of his teeth checked over. If he has developed any cavities since his first examination there are filled. In another six months he gets another check-up so that there is no danger of him losing teeth through neglect or having his health impaired by decaying molars.

The work of the Royal Canadian Dental Corps doesn't end in training camps in Canada. Overseas with our divisions are dental companies that are looking after the work of men who are manning Britain's coasts. And when those men invade the Continent the dental corps intends to go with them.

Along with the motorisation of other branches of the service the dental clinic has also been put on wheels. These mobile clinics are equipped with a dental chair, a laboratory, X-ray machines, instruments, heat light, electricity, and hot and cold running water.

Within sound of the guns emergency cases such as jaw fractures will be immediately treated, eliminating the necessity of moving men twenty or thirty miles behind the scene of action.

As the lines of battle shift the mobile clinics will shift their positions with them, always ready to give treatment and comfort to wounded men.

men if they have any complaints to make regarding the food. If they have, the complaints are dealt with to the satisfaction of the men. But as one Commanding Officer has remarked, "Complaints are few and far between because the men are being fed the finest foods available."

Men taking special training, such as the commandos, are fed special foods containing vitamins that will help them see at night, give them plenty of stamina and endurance for long route marches and tough assault courses.

Throughout the service men are assured of meals that will keep their health up to exacting army standards, and prepare them for the days of long battles and energy-consuming tasks.

and cannot be used.

1. A Ration Card is required for each individual 17 or over, regardless of age.

2. Each numbered coupon is good for a two weeks' ration of 1 lb. of sugar.

3. Coupon No. 1 is good July 1st; coupon No. 2, July 13th; coupon No. 3, July 27th; coupon No. 4, August 10th; coupon No. 5, August 24th.

4. Coupons cannot be used before the specified dates, but may be used any time afterwards.

5. Only coupons 1, 2, 3, 4 and 5 can be used for sugar buying.

6. Do not use coupons A, B, C, D and E, unless instructions are issued by The Wartime Prices and Trade Board. Do not detach them.

7. Coupons must be detached in the presence of your retailer. He will not accept loose, detached coupons.

8. If you do the buying for your home, or for a number of people, you may purchase sugar for them by taking their ration cards with you to the store.

9. If you order by telephone, coupons must be detached in the presence of, or by the delivery man.

10. Retailers may hold customers' ration cards and detach coupons for them in cases where customers are not ordinarily at home to take delivery; or in the case of summer cottagers having deliveries made by mail or express.

11. If you go visiting for a week or more, you should take your ration card with you for your host to use.

12. If you are a regular boarder in a house, you should turn your ration card over to your landlady so she may secure your sugar allowance.

13. You do not use coupons for the purchase of sugar for preserving, canning, jam or jelly making. Additional quantities are allowed for these purposes, for which you sign a special Sugar Purchase Voucher, which your grocer will give you.

14. You do not require coupons for sugar that you consume in restaurants or public eating places. These places are rationed and can only serve limited quantities to their customers.

15. Misuse of ration coupons is illegal and offenders are liable to prosecution.

16. Report to the nearest Wartime Prices and Trade Board office (a) if you lose your card, (b) if you change your name or address.

17. If additional ration cards are needed for new babies, or new Canadian residents, write to the nearest Wartime Prices and Trade Board office.

True independence is never afraid of appearing dependent, and true dependence leads always to the most perfect independence.

A Dismal Dominion Day

ELABORATE plans have been made for the observance of "Army Week" throughout Canada, and it is to be regretted that the smaller communities, because of their comparative isolation from many of the centers of military activity, are not able to participate in more extensive programs. In Toronto and other large centers the days are filled with interest for those "behind the men behind the guns", and while no formal program is being undertaken here, it is hoped that this week will see a flurry of parades and letters being sent to the boys and girls from this district.

Yesterday was also an important day in Canada's history. It marked the seventy-fifth birthday of this Dominion. The two events should have combined for some sort of formal observance, but the visitor to Grimsby saw little which would inspire him to believe that Canadians were interested in the fact. It was just fifteen years ago that Canada celebrated her diamond jubilee, and doubtless conditions at that time warranted a "do". Grimsby's Main Street yesterday presented a dismal aspect, with the two or three flags which were displayed standing out to accentuate the drabness.

True, we are at war, and we have many things on which to think these days. This fact, however, is hardly enough to warrant our completely neglecting Army Week and our national anniversary. The two events, coming as they do at the same time, should have provided ample opportunity for a patriotic display which could have been quite simple and at the same time quite impressive. If the appearance of Main Street Wednesday morning was anything to judge by, such a community affair would have provided a necessary antidote to the grim lassitude which into which we seem to be slipping. One United States tourist, stopping off to ask directions, enquired if it was not Dominion Day. When told it was his only remark was a one-syllable utterance: "Ouch!"

Yes, we are all busy right now, busier than we have been for some time. Yet there were enough citizens taking a holiday yesterday to make some community celebration a success. The contrast in the United States, where even the smallest hamlet will "blow the lid off" next Saturday will be sharp and eloquent.

A Problem To Solve

GRIMSBY is faced with one of the most unfortunate problems which could confront a small community. Juvenile delinquency, increasing at an alarming rate during the past several months, has now reached such proportions that no purpose can be served by ignoring it any longer. Mayor Edric Johnson, at the June meeting of the Grimsby Town Council, voiced his concern over the situation at that time when he remarked that practically all crime committed here recently has been the work of juveniles. Those who have an opportunity of studying the problem cannot but agree with this statement.

For what it is worth, it might be well to consider some of the more obvious features of the problem. The first, and it must have occurred to all citizens at some time or other, is that much of the trouble occurs at night. There is nothing on our streets to attract youngsters at ten and eleven o'clock in the evening, but scores of nine, ten, eleven and twelve year old boys are to be seen almost every evening roving around with no apparent purpose. Such purposeless wandering cannot but provide idle time for these lads who should be either studying or in bed.

Another factor which may not be familiar to many citizens is the number of times a small group becomes involved in the various occurrences. In the many break-ins, broken windows and other matters with which the police have to deal, one of this small group is almost invariably found to have been implicated.

As for the solution of the problem, that is a matter in which the whole community should take an interest. Boys of that age cannot be said to be inherently bad. Strong forces are working, and have been working, to divert youthful energy along worthwhile channels, and strong as these forces are, they are being opposed. The Grimsby Lions Club and the Imperial Order of Daughters of the Empire and the Imperial Order of Daughters of the Empire sponsor scouting and guide work. The Grimsby Lions Club makes swimming and hockey possible. The staff at the Public School have been giving much time and effort to the school manual training program, where youngsters come in after school and re-

ceive expert instruction in the use of tools, many of which have been made by the youngsters themselves.

Many of the men of this community have been named "big brothers", and have under their watch some of the lads who have found themselves getting into trouble. Their work, of which little is known, is valuable, and in many cases productive of the right results.

Despite these and many other factors working in the best interests of our children, there is a stiff and almost intangible opposition working against them which stems from a neglect on the part of parents, schools, scout troops, and all the other agencies attempting to perform a valuable service might just as well close up shop if they do not get the co-operation of parents who should be grateful, but who, when interviewed by a citizen trying to help their children, abuse him with the same type of language as that he is attempting to delete from the vocabulary of the youngsters.

The problem is one which concerns the people of Grimsby generally almost as much as it does the parents of the youthful lawbreakers. By now it is apparent to most that these youngsters have gotten over their fear of any consequences. Some of them have been heard to remark that the only result of an escapade is a "bawling out", and with this thought in mind, they have a feeling that they are immune to any further consequences of their mischief.

To punish these youngsters would, of course, bring some alleviation to the problem, but it would not solve it. What parent can claim immunity from the acts of his or her children when they allow nine and ten-year olds to run loose at ten and eleven o'clock in the evening? What is there for children to do at that time of night unless it happens that there has been a concert or some special event to keep them out once in a long while? The law makes parents responsible for the actual damage or loss which results from the activities of their children, but apparently makes no further claim on them for the proper upbringing of their children.

Contributing to juvenile delinquency is a punishable offence, but failing to contribute to those parts of a child's training which prevents juvenile delinquency does not appear to be covered by the criminal code in such a manner that a parent can be haled into court to share with his or her children the responsibility for crimes which, committed by a person of sixteen years of age or older, would result in penitentiary or reformatory terms. Yet some of the offences committed in this district in recent weeks can be punished by the imposition of a death sentence or life imprisonment.

Hydro's Propaganda

SINCE the days of Sir Adam Beck, the Hydro-Electric Power Commission of Ontario has issued a modest house organ type of publication called "The Bulletin" the purpose of which was "to furnish information regarding the Hydro-Electric Power Commission, to provide a medium for the discussion of Hydro matters and to maintain the co-operative spirit between municipalities, as well as between municipalities and the Commission." Largely technical in content, The Bulletin also has served in later years as a forum for Dr. T. H. Hogg whose utterances upon any occasion were given a prominent position as became his status of chairman and chief engineer of the system.

The Bulletin has now been succeeded by a more modern, more expensive and extensively illustrated publication called "Hydro News". Its new editor comes direct from an advertising agency to become a member of the Hydro staff and its purpose is obviously to sell the gospel of Hydro to a larger audience.

It is well-known that Hydro has no difficulty in disposing of all the power it can produce and that its revenues are now greater than ever before in its history. Since Hydro pays no Federal taxes, no provincial taxes and very, very little in municipal taxes and all surplus earnings are being plowed back into reserves, it is not difficult to see how Hydro can afford the additional expense of its new publication but one may question the purpose and the necessity of the change at a time when even the amount of metal going into printing type and engravings is carefully controlled.

The fact is that Hydro is expending large amounts of money each year for the purpose of maintaining its unique position of freedom from taxation. It is attempting to combat a rising tide of sentiment on the part of municipalities and taxpayers in general that government-owned properties using municipal services should pay for those services and that government-owned business enterprises should be subject to the same rates of taxation as are privately-owned business.

Hydro's growth and strength have come in large part from its almost total exemption from taxation. It is now after all too late to pay taxes and its share of the cost of the war. In failing to do this and seeking to direct public sentiment in its favor the Hydro-Electric Commission of Ontario is actually doing injustice to the great electric system that it controls.

NOTES AND COMMENTS

It is said, rightly or wrongly, that had General Rommel been in the Canadian Army there is every chance that he might have been made a sergeant.

He who laughs last, according to the modern version of the old proverb. However, it is doubtful if this will work who we discuss the Axis Armies. There has been just not enough laughing at them.

The cost of our effort should frighten no one but our enemies, as an eminent public personage. This does not mean that the occasional yelp from Mr. Jack Crow should be interpreted as a cry of joy.

The Battle For Raw Materials

An Editorial From
LIBERTY MAGAZINE

WE are a spendthrift nation. In the past we have almost gloried in that fact. We have pointed with pride to our own immense material resources, our sources of materials from other countries. We have thought in terms of spending, not of saving. Now we must save, or die of our own folly.

When this war began we were confident that an economic blockade would go a long way toward victory. Now we are startled and surprised at how relatively little it has accomplished. Let us admit that it has failed of the accomplishment we expected of it because of the intelligent devotion of our enemies. Perhaps devotion is too fine a word; perhaps compulsion would be better. Our enemies have been able to withstand us, to compensate for a lack of raw materials for war by drawing on the essentials of civilian life to an extent that we had not believed possible.

There had been no compulsion of necessity to make us save for war. Even with war upon us, we spent our resources as recklessly as ever. Why save rubber when we or our allies owned or controlled 82 per cent of the total world's supply? Why save tin when, again, we controlled as much? Why conserve iron and steel, when we had vast resources at hand, and while we controlled the vital alloys?

But the pattern of war has changed. We must change with it or lose our right to victory, and almost our hope of it. More and more men are needed, more and greater machines. Where will we find the surplus men to provide our iron and steel in such prodigious quantities? Where will we find the ships to bring the needed commodities from overseas? Where will we find those raw materials, now that the steam roller of Japan has taken from us most of our source of rubber, of tin, and much of our resources of oil and tungsten and bauxite, that precious source of aluminum?

We are faced today with an economic counterblockade. It has been imposed in part by enemy action, in part by the expanding demands of war. If we are to meet it, we must forget, for the time at least, our high standard of living. We cannot continue our old wasteful ways and have victory too.

We need 50,000,000 pounds of rubber this year. Where are we going to find it? Synthetic rubber won't be available this year, and our ordinary source of supply is closed to us. We have left only our swiftly disappearing reserves, and that great potential source, the odds and ends of scrap rubber that are found in every home. Here is your chance to help.

There is a need not only for rubber but for every kind of metal. We need 2,000,000 tons of scrap iron and steel alone for making tanks, guns, shells. Three quarters of a million tons of iron and steel are run off away uselessly on Canadian farms. As much more in Canadian attics and cellars and garages. Get it moving while there is still time, for time is limited.

We need paper, 200,000,000 pounds of it for various war uses. A newspaper a day from every Canadian home would alone make 5,000,000 containers for two-pounders tank shells.

We need firs and bones and rags—and many people in this country

A Grim Prospect

From The Huron Examiner

Tobruk has fallen and with went thousands of British prisoners and a countless amount of war material and supplies. Its fall has possibly opened the way to Egypt and oil and many other things that hearten the Hun. On the heels of that disaster has come the news that Sevastopol is all but lost, and if the Allies have to suffer the two, the situation in the Near East will be something that the enemy can view with glee, while we must view it with an element of despair.

Even the home news is anything but cheering. Japanese submarines bombed points on Vancouver Island and further along the American Pacific Coast. These things, of course, seem real to us, but their importance to the war situation is nil, compared to the far reaching consequences of the loss of Tobruk and the fall of Sevastopol.

Consequently, we have got to make up our minds now to the fact that all the sweat has not yet run; that all the blood has not yet been spilled, nor have all the tears yet been shed. It is not pleasant to contemplate, but we have got to face it, and to hope and pray that it is not yet too late for time and concerted effort to bring a change in our favor.

Citizens Must Share Responsibility

From The Durham Chronicle

That the war is taking toll of some industries was shown recently in the advertisement of a business in another nearby town, which announced it was going out of business on account of: War restrictions; Labor conditions; and the fact that so much bread was being imported into its market by trucks from outside that it could not compete. There was too much opposition.

Ironically enough, this business was forced to quit by the very same tactics it itself used when it started up a few years ago. It had trucks in every town in this vicinity, sold its products at cut prices, and did everything to put the small-town bakeries out of business. Now it has folded up itself for the same reason: too much outside bread being brought into its home market.

There isn't much one can do about it if the people of a town want to patronize outside bakeries. In fact there isn't anything that can be done. People just buy it, that is all, and we doubt very much if this bread that is being peddled around the country is any better than the smaller bakeries turn out.

To us, there is something screwy about the whole method of selling bread. If a bakery can afford to run a truck all over the country to sell its bread, it would seem to us that somebody is paying too much for it—probably the patrons in the town where the bakery is located. It certainly isn't the people to whom the bread is delivered. One bakery had trucks all over this country selling fifteen-cent cakes. If it could make a profit on this, it beats us.

are still wondering what they have to do with all-out war. No one has to convince the Germans. Every one in the enemy country knows the facts that should be known to us all: that every twenty pounds of household fats made into soap produces as a by-product two pounds of glycerine, enough to make four pounds of nitroglycerin, enough credits for a 4.7 shell to destroy an enemy sub. Fifty million pounds we need, half a pound weekly from every home in Canada. Soap makes vital glue for airplanes and fertilizer for essential crops.

This is a war of raw materials, the materials that you and I can spare. Don't let us talk of out-right war if we fail in this our part.

THE RAILWAY AND THE WAR . . . By Thurston Topham

Steamship Lines owned and operated by the Canadian railways have played a vital part in the war effort of the United Nations.

Two of the famous West Indies luxury liners were among the ships of the Canadian National Steamships fleet which fell victim to the Treacherous Axis U-boats.

The Lady Somers, requisitioned for War Service, was sunk in action in the Mediterranean on July 15, 1941, while serving as an auxiliary cruiser.

The Lady Hawkins was torpedoed and sunk with-out warning at dead of night in the Atlantic on Jan. 19, 1942.

Chief Officer P. A. Kasey, in charge of one of the Lady Hawkins's lifeboats containing 72 passengers and crew, sailed his boat for five days, weathering a violent storm, before being picked up by the SS Commo which took the survivors to port.

The CNR, in addition to its own ships representing British, Finnish, German and Italian vessels seized by the Canadian Government, its ships have carried thousands of troops and many tons of war materials to the various war zones.

No chances were taken by Chief Officer Kasey. Although the lifeboats were crowded, he carefully rationed the food, doing all the cooking and eating in the up-lifted cabin or a flash light—the "silver service" the survivors relied on.

THEAL-MILLYARD

A lovely June wedding was solemnized at 4 o'clock last Wednesday afternoon at Calvary United Church, London, when Thelma Bertha Millyard, daughter of Rev. and Mrs. J. E. J. Millyard, of that city, became the bride of Wylie Thomas Theal, P.M. B., son of Mr. and Mrs. R. T. Theal, Grimsby. The bride's father officiated assisted by Rev. Duncan McTavish.

Mrs. J. S. Pack played the wedding music and Miss Mary Byrne, of London, sang during the signing of the register.

The bride, who was given in marriage by her brother-in-law, Allan Willoughby, of London, was charming in a floor-length white gown of French Chantilly lace and net. The tightly fitted bodice was of lace. The skirt was of very full double net, over white taffeta, with a narrow inset of lace. The long leg o'mutton sleeves, with points over the hands, and the sweetheart neckline, were edged with narrow ruffling of net. The finger-tip veil fell softly from a sweetheart halo of the same lace edged with the net ruffling. She carried a cascade of Johanna Hill roses.

The bride's niece, Miss Marilyn Millyard, of Grimsby, was her only attendant. She was gowned in floor-length turquoise blue lace and net, with matching halo and shoes. Pink lace mitts completed her ensemble and she carried a colonial bouquet.

Lloyd Theal, of Grimsby, brother of the groom, was groomsman. Douglas Allan, London, and Erwin Phelps, Grimsby, were ushers.

Following the ceremony a reception was held at Glen Allen Villa for about 45 guests. Mrs. Millyard and Mrs. Theal assisted the bride couple in receiving the guests, the former wearing a blue sheer gown with white accessories and the latter in cameo pink with white accessories.

Later, Mr. and Mrs. W. T. Theal left for Toronto and from there left for a boat cruise through the Thousand Islands. The bride travelled in an aqua blue ensemble with matching turban and beige accessories, and a corsage of Johanna Hill roses.

On their return they will reside in Welland.

Grimsby guests at the wedding included Mr. and Mrs. Donald Beamer, Mr. and Mrs. Kenneth Baxter, Mr. and Mrs. Erwin Phelps, Mr. and Mrs. William Howson, Mr. and Mrs. William Shaffer, Mrs. Gordon Sinclair, Mr. and Mrs. Lloyd Theal, Mr. and Mrs. R. T. Theal and Mr. C. D. Millyard.

On Monday evening, June 29th, Mr. and Mrs. R. T. Theal, Grimsby, held a reception for about 35 guests at their home here in honour of the newly married couple.

Collect Salvage

(Continued from page 1)
on Wednesday morning, the co-operation of all in having their salvage ready for pick-up the night before is urged.

Mr. Wray also stressed that the local salvage depot on Main Street East is always open, and expressed the hope that citizens of the town could continue to bring in their scrap from time to time.

(Editor's note: On page four of this issue will be found an article reprinted from Liberty in which the importance of salvage is dealt with in a forceful and interesting manner. It will repay reading.)

SOCIAL AND PERSONAL

Mrs. E. Corman of Dunsmuir is visiting in Grimsby.

A.C. 2 Douglas Silver, R.C.M.F., Toronto, spent the weekend in Grimsby.

Mrs. Della Hill spent the weekend in Toronto, visiting with Mrs. W. H. Shields.

Miss Mary Mustard, of Dundas, spent the weekend in Grimsby visiting with the Misses Saffley.

Lieutenant and Mrs. J. Innes, of Toronto, are spending a few days with the latter's parents, Mr. and Mrs. R. Chase.

The many friends of Mrs. James Betts will be pleased to hear that she is improving in health in the Hamilton General Hospital.

Miss Kathleen Freeman, Adelaide Street, entertained the Sew-We-Knit Red Cross group at her home last Friday afternoon.

Mr. and Mrs. Geo. Kammacher, and Hugh Campbell, spent last week on a fishing expedition at Otter Lake, Parry Sound District.

Mrs. Earl Duffield and daughter, Sandra, of Kirkland Lake, are spending the summer months with Mr. and Mrs. R. C. Duffield, Grimsby.

Sgt. Harry Clark of the R.C. A.P., and Mrs. Clark and two children left on Tuesday for Melville, Ontario, to spend a week with Mr. and Mrs. Ed. Walker.

Sig. Alfred McMillan, R.C.N., spent a few days in Grimsby this week. Upon returning to his station he was accompanied by his wife, the former Miss Joyce Warner, who will reside in New Brunswick, near her husband's station.

Sunday Dinner Hints

Now that summer is here and appetites have started to lag why not pep up that Sunday dinner with a golden brown roasted chicken, and let last roast of pork you were thinking of buying go toward making up the shipment of pork to Britain. Here are two suggested menus for Sunday dinner:

No. 1
Apple Juice Roast Chicken with Dressing, Giblet Gravy, Boiled New Potatoes, Fresh Asparagus. Then how about a salad with the greens gathered from your Victory garden and top off the dinner with Strawberry Shortcake with whipped cream.

No. 2
Tomato Juice, Roast Chicken with Dressing, Giblet Gravy, Mashed or Rice Potatoes (if you are still finishing up that bag of old potatoes); New Peas, if preferred, canned peas and carrots, Rhubarb Betty Pudding.

Young Originals Help Bomb Victims

The Young Originals Circle "sale" last Tuesday, held at "Tommore," proved to be a most enjoyable evening as well as a great success, and as a result the Toronto Evening Telegram's British War Victims' Fund is to receive a check in the amount of \$56.51.

Refreshments, which were served in the diningroom, were presided over by Miss Heloise Markham and Mrs. Lodge, assisted by the Young Originals, who were on duty everywhere.

The badges which were pinned on the Young Originals' pretty summer frocks evoked much comment and interest. They represented the Circle's colours, blue and white, and indicated the position held by each: Captain, Ruth Cornwall; Lieutenant, Verba Shaffer; Founder Members, Marjorie Hawthorn, Gloria Jarvis, Catharine Morrison and Betty Shantz; Members, Grace Boyd, Janice Cornwall, Olga Ivanchuk, Irene Jones, Joyce Tremaine, Ann Wade.

The Young Originals Circle will be resuming its activities in the fall. During the past several months the members have been busy sewing and knitting, and the experience which they have gained during the past season would indicate that they are ready for an ambitious program next season.

"Five great enemies of peace inhabit with us—avarice, ambition, envy, anger and pride; if these were to be banished, we should infallibly enjoy perpetual peace."—Peterson.

GROFF-BLANCHARD

A very charming wedding was solemnized on Wednesday, June 24th, at the home of the bride's parents, when Genevieve Eileen, younger daughter of Mr. and Mrs. Leslie Blanchard, Grimsby, was united in marriage to L.A.C. Harry Stewart Groff, son of Mr. and Mrs. Herbert Groff, Beamsville. Rev. W. J. Watt of Trinity United Church, Grimsby, officiated at the ceremony.

The bride given in marriage by her father, was lovely in a street-length gown of blue crepe and carrying a bouquet of pink roses and sweet peas. Her only attendant, a sister, Miss Madeleine Blanchard, was dressed in yellow and carried a colonial bouquet of mauve sweet peas and daisies.

Mr. Garnet Stouck of St. Catharines was groomsman. The wedding music was played by Mr. William Tufford, Beamsville.

After the ceremony a reception was held for 25 guests.

The bride and groom will reside in Shediac, New Brunswick.

Local Women Busy At Fonthill Plant

Local women being transported daily by truck to and from a Fonthill canning factory is an indication of the labour situation in the fruit belt. These women are employed there at hilling strawberries and are being paid by the hour for the time taken in getting to and from work.

I.O.D.E.

The June business meeting of the Lincoln Loyalist Chapter, I.O. D.E. was held, on Monday, June 29th, with the Regent, Mrs. L. A. Bromley, presiding.

The executive were empowered to transact any business during the summer months. The treasurer's statement showed a substantial balance on hand.

Mrs. D. Cloughley, reporting for the War Service Committee, stated that 6 recruit boxes had been given out during the month. 1468 magazines and books sent to various centres and a shipment of clothing was being forwarded to headquarters this week. The War Service Committee issued an appeal for used clothing suitable for making over. These may be left with Mrs. George Warner or Mrs. W. Westlake.

Activities planned for September include a tag day for the Niagara Peninsula Sanatorium and the annual gift of fresh fruit for Christie Street Hospital.

Grave concern was expressed by members over juvenile delinquency in Grimsby and a resolution was passed urging that adequate measures be taken by the proper authorities to check the tendency toward crime and urging the town council to reconsider the establishing of a curfew law here.

Commandos Pick Up Tricks From Indian Warfare

IN camps across Canada, Commando-trained troops are preparing for the day when they will smash Hitler's Elite guards' legions to ribbons.

Combining tactics their grandfathers learned from the Indians with the use of automatic rifles, machine guns, grenades and mortars, blackfaced Commandos swarm across the English channel and stab at the heart of Germany.

Actually the Commandos will be used by the Canadian Army like a boxer uses his left—to keep jabbing at the enemy's vital spots in preparation for the knockout blow. Communications are disrupted, supplies destroyed and staff headquarters pulverized in lightning fast raids by highly trained squads that pack a terrific wallop.

In Ontario's camps during Army Week, the public will have the opportunity of watching men going through Commando training. Actually Commando training is only now spreading to every camp. The men are taking to it with zest and it soon promises to be the most popular form of any life.

The would-be Commando should be a man with a tough, wiry body and a keen mind. He is expected to move as silently as a cat and yet with the speed of a ferret. He must know thoroughly all the weapons of the ordinary infantry soldier and a few more specialized ones of his own. The Commando's favorite weapon is a long, razor-sharp knife with which he can kill an unsuspecting guard in a minute.

In preliminary Commando training, the men are toughened up. They are taught jujitsu, boxing and wrestling. They are put through obstacles course that would stop lesser men. This training not only teaches men how to take care of themselves in hand-to-hand combat, but builds up their resistance to fatigue.

Indian tactics are a favorite in Commando training. Men are taught how to conceal themselves and cross country without leaving a visible track. As much night fighting is done by Commandos, they are taught to move through strange country without being detected, even though they can't see 100 feet ahead. The poacher is another hunter whose tricks the Commandos have adopted. From him they have learned how to live off the country's game for days on end.

A prelude to the knockout punch at Germany has been the Commando raids on Norway, the Lofoten Islands and St. Nazaire. And stories from England hint at other raids of which details have not been revealed.

When the final lunge is made across the channel at Germany it will then be no military secret that the Commandos were first to spread death, destruction and terror among the enemy.

Saving Rubber — The Army Way

Canada's soldier is second to none and the training he is getting both here and overseas prepare him for fighting under hardest conditions. In the photograph above the Army driver has his own scheme of rubber salvage, travelling his jeep with all wheels off the ground. He's just cleared an obstacle and is levelling off for a four point landing.

—Photos—Public Information

ARMY NEEDS MEN OF ALL TRADES

This member of the Canadian Corps of Signals, working on a transmission set, will find that the skill which has been developed in the Canadian Army will serve him well in the days of Peace. Such work as he is doing was probably undreamed of at the start of the last war.

As seen in this list of tradesmen required by the Canadian Army, men of all aptitudes have a place in this great striking force which is considered among the best equipped and organized armies in the world. What follows is a partial list of types of qualifications to be found in battalions.

- Artificers R.C.A.
- Blacksmiths
- Bricklayers
- Boilermakers
- Butchers
- Carpenters
- Chef
- Clerks
- Coach & Spray Painters

CANADA PASSED BY THE PRESS CENSORS

That rubber stamp means we can say Canada's cotton textile industry is 11 times ahead of the war production records of 1914-18.

The industry is delivering about 215,000,000 yards a year of aircraft fabric, ammunition pouches, anti-gas cloth, camouflage netting, gun covers, parachute webbing, powder bags, uniform cloth, web equipment and other essential materials.

Dominion Textile is proud to have a part in this. We also wish to report that our plant employees are earning 78% more per hour than in 1939, and we pay 5.4 times more in taxes than the total paid to shareholders.

DOMINION TEXTILE COMPANY LIMITED
MONTREAL CANADA

Massey-Harris On War Footing

Plants Work at Capacity Producing Armament and Farm Equipment.

Remarkable evidence of the extent to which a large Canadian industry can swing into line and be an important factor in producing munitions for the war effort may be gathered from an illustrated booklet put out by Massey-Harris Company, entitled "Implements and Munitions for Wartime Needs."

Shells of three different calibres, wings and spars for trainer planes, light and heavy bodies for transport vehicles, special mechanized equipment for various branches of the services, metal fittings for aircraft, links for tank treads, are some of the implements of war which the company is producing in quantity. To meet the needs of the fighting forces for more shells, more planes, and more equipment, the wheels of Massey-Harris war industries are kept turning to maximum capacity.

The company has concentrated upon making shell projectiles, for which purpose three separate departments, one for 25-pounders, one for 60-pounders, and one for anti-aircraft shells, have been equipped and put into production. Modern automatic machines turn out shells four times faster than in the last war, and thousands upon thousands of shells come from these plants every week.

Application of the latest manufacturing methods has enabled Massey-Harris to produce quickly equipment for mechanized units. It makes bodies for motor vehicles in several sizes, gun porters, trailer units for special services, many of which have seen active service in the Libyan desert campaigns. One of the company's plants is now operating on a 24-hour schedule and is turning out two-and-a-half times as many wings per week as were called for in the original contract.

SOLDIERS' FAMILIES

MUIR'S
FAMILY SHOE STORE

FULL SELECTION OF
SUMMER SHOES FOR
SPORT OR DRESS
WEAR

In the United States the Massey-Harris Company has been given what is reputed to be the largest contract yet awarded to a manufacturer in the sale of W. 1000—a contract to make tanks in large quantities for the U.S. Army.

While the production of armaments takes precedence, and rightly so, yet mindful of the need for farm equipment to offset the labor shortage and the importance of vital food production programs, the Massey-Harris Company has been making tractors and implements insofar as materials are made available for the purpose through the administration and control set up by the Government, which in the best interests of our maximum war effort, has deemed it necessary to curtail considerably the production of farm machinery.

CUT COARSE FOR THE PIPE

OLD CHUM

CUT FINE FOR CIGARETTES

AN ARMY EVERY CANADIAN MAY WELL BE PROUD OF

♣ Crouched and poised, with disciplined impatience, waiting to pounce at the enemy, is Canada's great army which will form the spearhead of that decisive offensive just about to be—"a dagger pointed at the heart of Hitler."

That something, that the valour and ruggedness of this great country imports to men who have still a strong strain of pioneer blood in their veins, has made possible the mustering of an army unsurpassed for physical fitness, and which in mental mood and moral might is the most magnificent that has ever set forth to defend the freedoms and uphold the honor of this young and virile nation of ours.

We, of Massey-Harris, are naturally proud that many from the various divisions and branches of our far-flung organization are serving in the ranks of this great army. It is gratifying, also, that the thousands in our several plants are permitted to play an important part in providing the machines and munitions so essential to the success of that army in modern mechanized warfare.

And the great Canadian Army which has, as our Minister of National Defence says, "a larger proportion of armored troops than any army in the world," will be a decisive factor in hastening the day of victory.

MASSEY-HARRIS COMPANY LIMITED
THE SERVICE ARM OF THE CANADIAN FORM

THE GRIMSBY INDEPENDENT

MODERN LOCOMOTIVES
POSSESS BIG POWER

Locomotives now being delivered to the Canadian National Railways to haul wartime freight include a new arrangement of steam piping designed by System engineers to obtain greater power with economical coal consumption. On stretches of main line between Toronto and Montreal modern engines of the National Railways haul trains containing as many as one hundred laden freight cars when moving war supplies.

CANADIAN GUNS, MANNED BY CANADIAN
GUNTERS, HAVE DRAWN BLOOD OUT OF
ENGLISH SKIES; MOBILITY IS REASON

CANADA'S artillery, the hands of the Royal Canadian Artillery, is quite different from former days.

The big and little guns, now rubber-tired and tractor-drawn, are swung into action by gunners who have been trained to split-second accuracy. Gone is the clumsy, horse-powered movement of past wars. The wicked shouts of anti-tank guns, field artillery and aircraft guns now blast death forth from positions that can be changed in a matter of minutes.

The gunners themselves are keeping pace with the speed of their charges. From a seemingly vulnerable line moving down a road the guns can be shifted into action almost as soon as they stop moving. Every man of a gun crew knows his own job thoroughly, as also those of his comrades. So as the gun halts men hit the ground, moving to their various tasks like synchronised machinery. Within two minutes after an order

Guns and more guns demonstrate the splendid way Canadian industry has risen to meet the needs of the Canadian Army. Starting from scratch, this country is now turning everything from rifles and machine guns to heavy artillery like this and . . .

to halt the gunners can have their gun ready to fire.

From field artillery down to the small, but nonetheless deadly, anti-tank guns, speed and mobility have been drilled into gunners as prime necessities in winning battles. Anti-tank gunners can whirl into action in seventeen seconds! The roaring monsters of tank warfare hold no fear for them. They know a well-placed shell from their powerful little gun will knock out the largest tank the enemy can put into the field.

Canadian anti-aircraft gunners have many times drawn German blood in the skies of England. Canadian A.A. batteries guard Britain's coasts and vital war industries. Their long barrels have already hurled thousands of pounds of death at the German air force. And the roar of their firing has only been a prelude to the steel-jacketed challenge that will soon be hurled across enemy soil by the Royal Canadian Artillery.

Heavy equipment such as this in the control chamber of one of Canada's gigantic west coast defence spots. Here a gun crew are seen swinging a delicately balanced gun weighing several tons into firing position. This gun-control room is set deep in concrete.

CANADA'S UNIVERSAL CARRIERS DISPLAY
AMAZING VERSATILITY DEMANDED BY WAR

Stout, versatile, are Canada's universal carriers, show here in two typical scenes which demonstrate their remarkable manoeuvrability. Constructed of a special heat-resistant metal, and with a speed of upwards of fifty miles an hour, they are now pouring off Canada's assembly lines, and are seeing service throughout the world.

Developed as one of Canada's

contributions to the war, the universal carrier is the modern version of the scout car of the last war, and it has won the praise of famous soldiers in Great Britain, the Far East and the Near East. Field Canada's General A. G. L. McNair has said: "We are tremendously enthusiastic about the universal carrier

and the way they operate." Production of these machines, which can "turn on a dime" roar up and over steep hills, ford streams and cross ditches and ravines is now at a peak which assures Allied armies of a sufficient number when the time comes that they can be used for the invasion of Europe.

GIRLS FIND BUDGET DOES NOT
HAMPER CHOICE OF ARMY WEAR

MEMBERS of the Canadian Women's Corps look deceptively chic and feminine in their trim new uniforms . . . but they're as deadly earnest about winning the war as the toughest man with a rifle.

As drivers, motorcyclists, laboratory assistants, switchboard operators, clerks, bookkeepers, dental assistants, x-ray technicians, and cooks, they have already released hundreds of men in A and B category for combat duty.

When a girl volunteers for the Women's Army Corps she must pass a physical examination as stiff as that of a fighting man. Girls can't be accepted for service unless they are physically sound. Chest, ears, eyes, nose, teeth and bodies generally are checked over by careful army physicians.

Once a recruit passes her medical she is attested and given a uniform and other personal equipment. The first visit to the Q.M. stores is quite an adventure for the girls. For once they can outfit themselves without worrying about price. Partly tailored uniforms are fitted on the volunteer and then completed by a tailor. The list of other equipment the girls receive reads like this: trench coat, brown oxfords, overboots, knife, fork and two spoons, kit bag, shirt, tie, sweater, button stick, gloves, great coat, gas mask, flask, mitts, knapsack, shoe brush, purse and hat.

The question of under clothes for the C.W.A.C. turned out to be a problem that even Canada's competent Ordnance Corps couldn't handle. Staff officers and designers in Ottawa spent embarrassed and sleepless nights wondering what to do about the underwear question. Then someone made a suggestion 'hat put a stop to the blues—give the girls \$15, when

they enlist and \$15 every three months thereafter and let them buy their own lingerie. It was done much to the satisfaction of everyone—including the girls themselves.

The first three months in the C.W.A.C. a girl spends as a recruit at 90¢ a day. It's during this period that girls get most of their training. They receive instructions in marching, military law, discipline, air raid precautions and gas drill. The girls usually take to their training like the well-known duck to water. And Army instructors have high praise for their efficiency and willingness to learn.

When a girl has completed her three months she is raised to the rank of private and her pay is increased to 95¢ per day. When she gets stripes she receives \$1.00 per day, as a Lance-Corporal; \$1.15 as a full Corporal and \$1.50 as a Sergeant. The "Wacks" can also rise to the rank of Staff-Sergeant, Sergeant-Major and Quartermaster, with additional increases in pay.

Privates and N. C. O's of the C.W.A.C. are also eligible for trades pay. And once they have qualified in one of the Women's Army's many trades such as clerk, book-keeper or dental assistant, they are graded for A, B, or C, trades pay, which means 75¢, 50¢ and 25¢ a day extra pay respectively.

As well as the chance at promotion to a N.C.O. the girls get a chance to win their "pipe", providing they show good administrative ability and a sound knowledge of their particular job.

As the Canadian Army increases the C.W.A.C. will also expand its personnel to take care of the jobs which relieve men from office work, driving and cooking

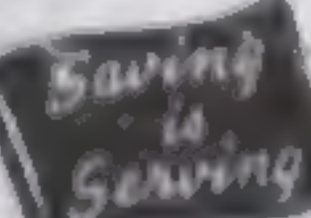

"I'm not going to blush when my soldier boy comes home!"

"THE WAY I look at it is this. My boy enlisted of his own free will. He's got to do without a lot of things he's been accustomed to. I won't feel right if I couldn't go without something too!"

"The least I can do is to work hard and save. My kitchen, my shopping bag, my work basket are the nearest I can get to his battlefield. But I can buy War Savings Stamps—and lots of them—every week, so that he may have the tools to win. And that's what I'm doing! How about you?"

Buy War Savings Stamps from banks, post offices, telephone offices, department stores, drug stores, grocers, tobacconists, book stores and other retail stores.

Mrs. Gordon Cole Is Appointed To Beach School Staff

Mrs. Gordon Cole, who has had considerable teaching experience in Toronto suburbs and in Hamilton, has been appointed to the staff of the Grimsby Beach Public School, and she will commence her duties in September. Mrs. Cole's appointment followed the resignation of Miss Marian Barber, who recently joined the Women's Division of the Royal Canadian Air Force.

Installation of the new washrooms has been completed at the school. While members of the Board recognized the fact that these additions would prove expensive, they point out that the equipment was needed, and that having now been installed, it will no longer be a matter for debate and further payments.

Shafer Brothers Given Contract To Repair School

The Grimsby Board of Education, at a special meeting held last Friday evening, contracted with Shafer Brothers for the rebuilding of the east block of the Grimsby Public Schools which was destroyed by fire last week.

No estimate of the damage that resulted when the fire burned through the building for three hours is yet available, and it was agreed by the company holding the insurance policy that the contract for the repairs should be awarded, and that the settlement would be made when the adjusters, working in co-operation with the contractors, have an opportunity of studying the building more closely than is possible at present.

The work is to be started immediately, and it is hoped that it will be completed by the time that school opens next fall.

Over Ninety Now At Farm Service Force Center Here

Developing into one of the largest Farm Service Force centers in the Niagara Peninsula is the center which was opened here last Thursday evening with the arrival of some sixty girls and a staff of twelve. The demands for more help have become so great that already the local force has been increased to ninety three, and it is expected that the figure will go over the hundred mark before long.

Some twenty five girls arrived in Grimsby Sunday, and another two Monday, while on other days they have been arriving by twos and threes.

The Grimsby camp was the 52, tenth to be opened in Ontario, and numbers in its personnel two teachers from Great Britain who have been in charge of British school children sent to this country for the duration.

In charge of recreation is Miss Marion Fom, B.A., who is a director of physical education at Queen's University; Miss Flora Nesbitt, of Ebor is the nurse in charge, while Mrs. James Dunham, B.S., has also been appointed to the staff.

Away Back When

(Continued from page 1)

all. Then a quarter of a century ago when the gas buggy came out in all over the continent the Horse-shoe and the Smith began to work upon an automobile which was to him, more or less, a Brain Child of the Devil.

It was but another sign of the changing times. Today the vil-lage rapidly faded from our everyday life. There being no place for a horsehoe on a car and the Smiths would not lower his dignity to large blacksmith stands under a spreading gasoline pump instead of a chestnut tree and he keeps the muscles of his brawny arms fit by jacking up the prices of gas and oil.

The only shoes he knows much about are his own and the kind that have "34x1 1/2" stamped on them and sell for \$18 each and up, mostly up.

The passing of the horsehoe from its position in the sentiment in life is to be deplored. Not so many years ago, as the crowd flies, it was the symbol of good luck and every home had at least one hung up some place about the premises.

A house might be short a deer, a window, a blind, a kitchen stove and any considerable amount of furniture, but it was seldom short a horse shoe. This was in the era of the lightning rod, the four leaf clover, the medicine man, the magic lantern, the hitching posts, the spand of bays, corsets, the iron dogs and the young lady who could be considered perfectly normal and companionable without the cigarette and the cocktail habit.

To be walking along the road and find a horsehoe used to be an incident to stir the emotions. It meant good luck. Even if stolen from holes in your evening clothes and white gloves, you'd pick it up, take it home and fight any man who tried to take it away from you.

HORSE FEATHERS

The horse is a noble And trusty steed, A friend of man Who's a friend indeed: A friend in war, And a friend in peace To poloists, ploughmen, And mounted police.

Imagine Ben Hur, The charioteer, Or Lady Godiva, Or Paul Herve, Or blood on a center Through the park, Or equestrian statues Of Joan of Arc, Or Jesse James, Or a bareback artist— Without this dumb But deserving beast.

So here's to the horse— An out-fitted bin, A verdant pasture To frolic in, A lump of sugar, And a nice, warm stall— For giving the filly Who had my all On her velvet nose; In the sixth, today, And who romped in last Like a spavined dray.

Some people used to gild them. In many a family there were so many horsehoes hung around the house that when moving time came the Old Man couldn't get anybody to do the moving job except a dealer in old iron.

Then some fellow who had no regard for human life or human sentiment came along and invented the automobile. This changed everything. There is no luck in anything that falls off an automobile.

All a car can find to day when he walks along the road is perhaps a discarded tire, a piece of old chain or a quart or two of bolts and nuts.

And if he stops over to pick 'em up he winds up in a hospital with surgeons bending over him exploring for fender parts.

"Let war be so carried on that — object may seem to be sought but the acquisition of peace." — Cicero.

"We love peace, as we abhor pusillanimity; but not peace at any price. There is a peace more destructive of the manhood of living men than war is destructive of his material body. Chains are worse than bayonets." — Douglas Jerrold.

At Moore's Theatre

Appearing at Moore's Theatre this Friday and Saturday, July 2nd and 3rd is the gay romantic comedy-drama "To The Shores of Tripoli" starring John Payne, Maureen O'Hara, Randolph Scott and Nancy Kelly.

Never has the use of Technicolor been more effectively used than in the filming of this picture—a story of the U.S. Marine Corps. It reveals the night firing of broadsides of big guns aboard Uncle Sam's battlewagons. The effect of the orange flame belching pieces against a velvet black background is probably one of the most stirring spectacles ever captured by celluloid. The training of leathernecks, and their celebrated esprit de corps furnish the general subject matter, against which is told the story of a cocky, spoiled youngster (John Payne) who tangles with a hard-bitten sergeant (Randolph Scott) and ends up being ostracized by his comrades. Through a display of heroism he makes himself a right again with the marines, but decides to give up the service and go back to an office job which wealthy debutante (Nancy Kelly) has been trying to persuade him to do. But a military nurse, (Maureen O'Hara) has won her way into his heart and no matter what he cannot seem to forget her. When the Japs attack Pearl Harbour and the Marines are marching to board a battleship, John Payne, riding along in a taxi, sees them and joins them to go to war. He is rewarded with the fact that the nurse is going on the same boat.

Two Grimsbarians Received Medals

Two local officers, one of them overseas, have been awarded the Canadian Efficiency Decoration this week. They are Major Frank T. Shoenbridge, of No. 2 District Stores Section, Royal Canadian Ordnance Corps, and Lieut-Col. J. Ewart Wright, formerly of the South Saskatchewan Regt. Col. Wright has retired from active service, and is now conducting a dental practice in St. Catharines.

In addition to these awards, the first class of the Canadian Efficiency Medal was awarded to Sergt. Lloyd W. Phlips of the Royal Canadian Ordnance Corps, now stationed at Toronto.

These decorations were announced from headquarters of military district No. 2, Toronto, Tuesday, and were among a long list of medals and bars awarded to Canadian troops in Canada and overseas.

WE'RE PROUD TO SERVE THE FAMILIES...

OF THE SOLDIERS SERVING CANADA

Each day they come to our restaurant — Mothers, Fathers, Brothers, Sisters. Many of them we know well personally, and, as often as not, we knew their relatives before they became gentlemen in battle dress. There is not a day which passes that something or someone does not remind us of some lad now wearing the uniform of his King.

Now, with Army Week being observed throughout Canada, we take this opportunity of sending a special greeting to our friends, and of expressing the hope that they will be home before long.
